ISSN 0550-3213

VOLUME B370 (1992) No. 4 JUNE 1992

NUCLEAR PHYSICS B

PARTICLE PHYSICS

Section devoted to the experimental and theoretical study of the fundamental constituents of matter and their interactions

Associate Editors for Particle Physics: S.J. Brodsky, SLAC; N. Cabibbo, Rome; D. Cline, UCLA; J. Ellis, CERN; K. Fujikawa, Hiroshima G.W. Gibbons, Cambridge, UK; S. Glashow, Harvard; P. Goddard, Cambridge, UK; V.N. Gribov, Moscow; D. Gross, Princeton; R.L. Jaffe, MIT; K. Kajantie, Helsinki; L.M. Lederman, Fermilab; G. Mack, DESY; C. Rubbia, CERN; F. Scheck, Mainz; A. Schwimmer, Weizmann; G. Steigman, Ohio State; G. 't Hooft, Utrecht; S.C.C Ting, DESY-MIT; S. Weinberg, Texas; J. Weyers, Louvain; B. Wiik, DESY; F. Zachariasen, CALTECH; J. Zinn-Justin, Saclay

Supervisory Editors: G. ALTARELLI, J.L. CARDY, M. DERRICK, L. MAIANI, H.R. RUBINSTEIN

Administrative Editor: K. Jones

FIELD THEORY and STATISTICAL SYSTEMS

Section devoted to common problems in Field Theory and Statistical Mechanics

Associate Editors for Field Theory and Statistical Systems: B. Duplantier, Saclay; C. Itzykson, Saclay; A. Luther, Copenhagen; G. Parisi, Frascati; A.M. Polyakov, Moscow; R. Savit, Ann Arbor; H.E. Stanley, Boston; F. Wegner, Heidelberg

Administrative Editor: K. Jones

NOTE TO AUTHORS

Contributions to "Nuclear Physics B" should be sent in duplicate to: Editorial Office of "Nuclear Physics B", Matrix Building, Science Centre WCW, Kruislaan 419, 1098 VA Amsterdam, The Netherlands. The Editorial Office can also be reached by telephone at: +31 20 5618181; FAX +31 20 6654969; e-mail at npb@nikhef.nl. Contributions from the USA may also be sent to either of the following associate editors: Professor D. Cline, Physics Department, UCLA, Los Angeles, CA 90024; Professor F. Zachariasen, Charles C. Lauritsen Lab. of Physics, CALTECH, Pasadena, CA 91125. Papers in experimental high-energy physics will be published in the **Rapid Communications** section of the journal, and should be submitted to one of the following: Professor W. Bartel, DESY F11, Notkestrasse 85, D-2000 Hamburg 52, Germany (e-mail: f11bar@dhhdesy3.bitnet); Professor M. Derrick, Argonne National Laboratory, High Energy Physics D-362, 970 South Cass Avenue, Argonne, IL 60439, USA (e-mail: mxd@anlhep.bitnet); Professor L. DiLella, CERN, 1211 Geneva 23, Switzerland (e-mail: dilella@cernvm.bitnet). They should be accompanied by a covering letter, indicating, in case of joint authorship, to whom further correspondence, proofs, etc., should be addressed. Authors should take care that their contributions are written in good English: "broken English" is not acceptable.

Manuscripts for Nuclear Physics B should be prepared in accordance with the rules and conventions outlined in **Instructions to Contributors** which appear on the rear inside cover of most issues.

All papers are subject to refereeing. "Letter-type" contributions and unnecessarily long papers are unacceptable. Authors should make every effort to achieve the utmost concision compatible with clarity. They should make a careful survey of the literature to ensure that papers do not duplicate previous work and that relevant existing knowledge has been taken into account. It should be realised that the criteria for refereeing are very high. *At present only 50% of the papers submitted are immediately acceptable.*

The Editors and Publishers aim at the following *time schedule*: within one week of submission the Author should have received acknowledgement of receipt of his manuscript. Within two months (normally within one month) he should have had notification of acceptance or rejection, or a request for revision. After receipt of an acceptance card, he should receive proofs within six weeks. Finally, six weeks after returning the corrected proofs, the paper should be published. For post-acceptance desk-editorial matters, reference may be made to: Nuclear Physics B, P.O. Box 103, 1000 AC Amsterdam, The Netherlands (Tel: +31 20 5862 571; e-mail nhpnuclear@elsevier.nl).

NUCLEAR PHYSICS A is published in weekly issues. 15 volumes (60 issues) have been announced for 1992. The subcription price for these volumes is Dfl. 7740.00 including postage and handling.

NUCLEAR PHYSICS B is published in weekly issues. 21 volumes (63 issues) have been announced for 1992. The subscription price for these volumes is Dfl. 10836.00 including postage and handling. The price for a combined subscription to *both* sections A and B is Dfl. 15336.00 including postage and handling. NUCLEAR PHYSICS B [FS] (Field Theory and Statistical Systems) is no longer available under separate subscription. It continues to appear as an integral subsection of Nuclear Physics B.

NUCLEAR PHYSICS B (Proc. Suppl.) (Proceedings Supplements) is that part of section B containing selected topical conference proceedings. It appears independently of the other sections of Nuclear Physics B. 5 volumes (10 issues) have been announced for 1992. The subscription price for these volumes is Dfl. 1355.00 including postage and handling. The price for a subscription to Nuclear Physics B (Proc. Suppl.) for those authors subscribing to *either* section B *or* sections A + B is Dfl. 1105.00 including postage and handling.

SUBSCRIPTIONS should be sent to the Publishers, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, or to any subscription-agent.

CLAIMS FOR ISSUES NOT RECEIVED should be made within three months of publication. If not, they cannot be honoured free of charge.

BOOKS FOR REVIEW should be sent to the Editorial Office of "Nuclear Physics".

US mailing notice – Nuclear Physics B (ISSN 0550-3213) is published weekly by Elsevier Science Publishers, Molenwerf 1, Postbus 211, 1000 AE Amsterdam. Annual subscription price in the USA US$5916.00 (subject to change), including air speed delivery. Application to mail at second class postage rate is pending at Jamaica, NY 11431.
USA POSTMASTERS: Send address changes to Nuclear Physics B, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publication Expediting.

The Journal of Geometry and Physics is an International Journal in Mathematical Physics. The Journal stimulates the interaction between geometry and physics by publishing primary research-, discussion- and review articles which are of common interest to scientists in both fields.

The Journal covers the following areas of research:

Methods of:

- Lie groups and Lie algebras and their representations
- Quantum groups and their representations • Algebraic geometry
- Differential topology • Real and complex differential geometry
- Geometrical approaches to dynamical systems and partial differential equations • Global analysis
- Non-commutative differential geometry

Applications to:

- Classical mechanics of systems of finite and infinite degrees of freedom • Quantum mechanics, especially geometrical schemes of quantization • Classical and quantum field theory
- Quantum fields on curved space-time • Classical and quantum gravity • Strings and superstrings

A Selection of Recently Published and Forthcoming Papers:

• *E. Witten:* Two dimensional gauge theories revisited • *J. Chr. Larsen:* Singular semi-Riemannian geometry • *C. Ferrario and A. Passerini:* Dynamical symmetries in constrained systems: a Lagrangian analysis • *D. Gurevich, V. Rubtsov and N. Zobin:* Quantization of Poisson pairs: the *R*-matrix approach • *G.W Patrick:* Relative equilibria in Hamiltonian systems: The dynamic interpretation of nonlinear stability on a reduced phase space • *J. Grabowski:* Abstract Jacobi and Poisson structures: Quantization and star-products • *A. Cabras and A.M. Vinogradov:* Extensions of the Poisson bracket to differential forms and multi-vector fields • *B.A. Khesin :* Ergodic interpretation of integral hydrodynamic invariants • *J. Kijowski and G. Magli:* Relativistic elastomechanics as a Lagrangian field theory • *C. Moreno and L. Valero:* Star products and quantization of Poisson-Lie groups • *E. Musso:* The local embedding problem for optical structures • *G. Landi and C. Reina:* Symplectic dynamics on the universal Grassmannian • *F. Ongay-Larios and O.A. Sánchez-Valenzuela:* Hamilton's equations and supersymplectic flows on (2,2)-dimensional superspace.

STUDIES IN MATHEMATICAL PHYSICS

This new series aims at discussing recent developments in physics offering sound mathematics and a high didactical quality. The emphasis lies on techniques, ideas and methods that are fundamental, interesting and innovating in both mathematics and physics, herewith building a bridge between the two disciplines.

Volume 5:

The Mathematical Foundations of Gauge Theories

by **K.B. Marathe** *and* **G. Martucci**

1992 xxii + 372 pages
Price: US $111.50/Dfl.195.00
ISBN 0-444-89708-9

Theoretical physicists tend to discuss their theories in the language of mathematics. However, the adequate mathematical formulation may not yet be available when the physical law is first discovered. Mathematical physicists trying to develop the relevant mathematics for these theories, may obtain new insights into old mathematical structures or may even disclose entirely new structures. Gauge Theory is such a gift from physics to mathematics. This volume presents a self-contained development of a differential geometric formulation of gauge theories, in particular, the theory of Yang-Mills fields.

The book is aimed at advanced graduate students and research workers in theoretical physics and pure and applied mathematics who are acquainted with the elements of the theory of differential manifolds. It enables the reader to apply this theory to gauge theories and to understand the role of gauge theories in high energy physics, gravitation theory and electromagnetism.

Contents: Preface. 1. Elements of differential geometry. 2. Principal and associated bundles. 3. Theory of connections. 4. Algebraic topology of manifolds. 5. Characteristic classes. 6. Theory of gauge fields. 7. Associated fields. 8. Yang-Mills fields. 9. Instantons and their moduli spaces. 10. Yang-Mills-Higgs Fields. 11. Quantization of gauge fields. A. Dictionary of terminology. B. Point set topology. C. Categories and functors. D. Chain complexes. E. Clifford algebras. Bibliography. Glossary. Index.

Volume 4:

Green Functions for Ordered and Disordered Systems

by **A. Gonis**

1992 xxi + 694 pages
Price: US $131.50/Dfl.230.00
ISBN 0-444-88986-8

The book presents an exposition of Green functions and multiple scattering theory (MST) as presently used in the study of the electronic structure of matter. Ordered, as well as substitutionally disordered systems are discussed. This volume deals with both a tight binding approach to and a first-principles formulation of Green functions and multiple scattering theory.

Volume 3:

Huygens' Principle 1690-1990:
Theory and Applications

Proceedings of an Int. Symposium, The Hague, November 19-22, 1990

edited by **H. Blok, H.A. Ferwerda** *and* **H.K. Kuiken**

1992 xiv + 564 pages
Price: US $128.50/Dfl.225.00
ISBN 0-444-89423-3

Huygens' wave principle continues to play an important role in the understanding of wave phenomena and papers included in this volume present a wide range of topics to which the Principle applies. The subjects covered include the historical background, geometrical optics, ray and field theory, the mathematical analysis of wave propagation, quantum electronics and nonlinear optics.

Volume 2:

Structures in Dynamics
Finite Dimensional Deterministic Studies

by **H. W. Broer, F. Dumortier, S.J. van Strien** *and* **F. Takens**

1991 x + 300 pages
Hardbound: US $ 108.50/Dfl.190.00
ISBN 0-444-89257-5
Paperback: US $ 62.75/Dfl.110.00
ISBN 0-444-89258-3

Presenting the contents of its authors' graduate courses in non-linear dynamical systems, this volume aims at researchers who wish to be acquainted with the more theoretical and fundamental subjects in non-linear dynamics and is designed to link the more popular literature with research papers and monographs.

Volume 1:

Lie Algebras
Part 1 - Finite and Infinite Dimensional Lie Algebras and Applications in Physics

by **G.G.A. Bäuerle** *and* **E.A. de Kerf**

1990 xvi + 394 pages
Price: US $105.50 / Dfl.185.00
ISBN 0-444-88776-8

The structure of the laws in physics is largely based on symmetries. This book is on Lie algebras, the mathematics of symmetry. It has grown from lectures for undergraduates in theoretical and mathematical physics and gives a thorough mathematical treatment of finite dimensional Lie algebras and Kac-Moody algebras. Concepts such as Cartan matrix, root system, Serre's construction are carefully introduced.

INSTRUCTIONS TO CONTRIBUTORS

1. The manuscript should be submitted in duplicate and should be typewritten on one side of the paper only, with wide margins and double spacing. The manuscript must be accompanied by original figures, and by manuscript-sized copies, if the originals are large.

2. The footnotes (as few and as short as possible) should be typed at the foot of the page on which they are indicated. PLEASE DO NOT MIX FOOTNOTES AND REFERENCES.

3. The reference list should comply with the following points:
   Reference to a paper
   [1] S.L. Glashow, J. Iliopoulos and L. Maiani, Phys. Rev. D2 (1970) 1285;
   L.P. Kadanoff and A.B. Zisook, Nucl. Phys. B180 [FS2] (1981) 61

   Reference to a book
   [2] C. Itzykson and J.-B. Zuber, Quantum field theory (McGraw-Hill, New York, 1980) p. 1

   Reference to a conference report
   [3] UA1 Collaboration, presented by K. Eggert, Proc. Int. Europhysics Conf. on High energy physics, Brighton, UK, 1983 (Rutherford Appleton Laboratory, Chilton, Didcot, UK, 1983) p. 447

   Reference to a laboratory report
   [4] K. Symanzik, DESY internal report T-71-1 (1971) 1

   Reference to a preprint
   [5] G. Zweig, CERN preprints TH 401, 402 (1964)

4. Three-vectors should be wavy underlined. Four-vector scalar products should be indicated with a (raised) period

5. Clear distinction between 0 (zero), O (Capital), o (lower case), 1 (one), l (lower case), x, × (multiplication); S, P (Capital), s, p (lower case), etc., should be made.

6. The correct abbreviations of some commonly abused units are: sr, fm, GeV, keV, mb.

Special regulations for authors – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. The transfer will ensure the widest possible dissemination of information.

Submission to this journal of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the USA – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. (NB. For review journals this fee is US $0.25 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products' liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

SUBSCRIPTION INFORMATION

The Journal will start publication in the Fall of 1992. The first issue is scheduled to appear in November 1992. Volume 1 in 4 issues (1992/1993) includes about 400 pages. Subscription price for volume 1: US $172.50/Dfl.316.00 (incl. postage & handling costs)

ISSN 0927-6505

AIMS AND SCOPE

ASTROPARTICLE PHYSICS will publish experimental and theoretical research papers focusing on new developments in the following areas:

- High-energy cosmic-ray physics and astrophysics
- Particle cosmology
- Particle astrophysics
- Related astrophysics: supernova, AGN, cosmic abundances, dark matter, etc.
- High-energy, VHE and UHE gamma-ray astronomy
- High- and low-energy neutrino astronomy
- Instrumentation and detector developments related to the above-mentioned fields.

PAPERS SCHEDULED FOR PUBLICATION IN THE FIRST ISSUE(S):

- Mont Blanc LCD Group *(M. Aglietta, P. Antonioli, G. Badino, G. Bologna, C. Castangnoli, A. Castellina, V.L. Dadykin, W. Fulgione, P. Galeotti, F.F. Khalchukov, E.V. Korolkova, P.V. Kortchaguin, V.B. Kortchaguin, V.A. Kudryavtsev, A.S. Malguin, L. Periale, V.G. Ryassny, O.G. Ryazhskaya, O. Saavedra, G. Trinchero, S. Vernetto, V.F. Yakushev, G.T. Zatsepin)*: Limits on low energy neutrino fluxes with the Mont Blanc Liquid Scintillator Detector
- AGASA (Akeno Giant Air Shower Array) Collaboration *(N. Chiba, G.M Dion, N. Hayashida, K. Honda, M. Honda, N. Inoue, K. Kadota, F. Kakimoto, K. Kamata, S. Kawaguchi, N. Kawasumi, Y. Matsubara, M. Nagano, H. Ohoka, T. Teshima, I. Tsushima, S. Yoshida, H. Yoshii, T. Yoshikoshi)*: Possible evidence for 5-10 GeV neutrons associated with the solar flare of 4 June 1991
- *A.P. Kornienko, A.A. Stepanian, Yu.L. Zyskin*: The influence of imaging camera characteristics on the measured parameters of Cerenkov flashes
- *A. Messina, F. Lucchin, S. Matarrese, L. Moscardini*: The large-scale structure of the Universe in skewed cold dark matter models
- *T. Altherr, U. Kraemmer*: Gauge field theory models for ultra-degenerate and ultra-relativistic plasmas
- *X. Chi, C. Dahanayake, J. Wdowczyk, A. Wolfendale*: Cosmic rays and cosmic strings
- *R. Protheroe, A. Mastichiadis, C. Dermer*: Pair-Compton cascading in a spatially varying anisotropic radiation field
- MACRO Collaboration (Gran Sasso Lab): Stellar collapse search
- ALICE Detector (Goddard/Siegen): Elemental abundance of GeV cosmic rays
- *S. Karakula, W. Tkaczyk*: The formation of cosmic ray energy spectrum by photon field
